ELM ACADEMY

What is the CogAT?

The Cognitive Abilities Test, or [CogAT](#), is a nationally standardized multiple-choice test that is often used to identify students for gifted and talented programs. The test is divided by grade level, with the [CogAT Level 5/6](#) being administered to kindergarteners. The most current version of the test, the CogAT Form 8, has three sections: Verbal, Nonverbal, and Quantitative. Each of these sections has three unique question types. The table below shows all nine question types:

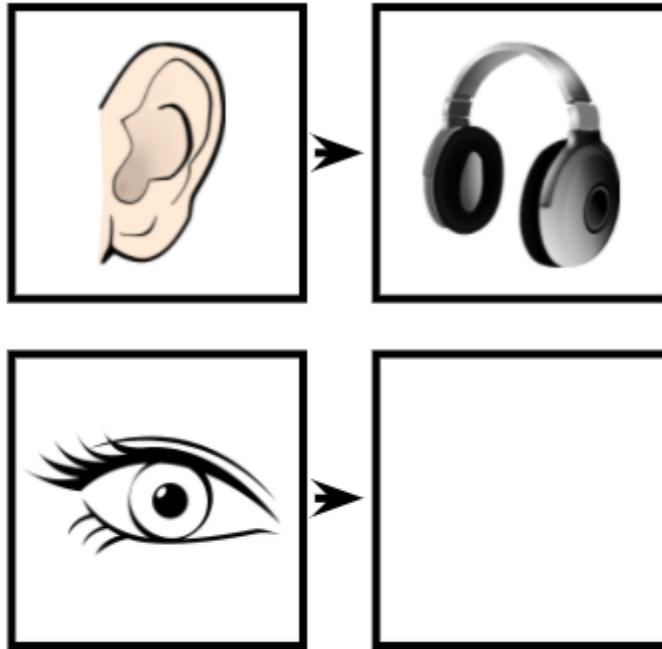

Verbal Battery	Nonverbal Battery	Quantitative Battery
Picture Analogies	Figure Matrices	Number Analogies
Sentence Completion	Figure Classification	Number Puzzles
Picture Classification	Paper Folding	Number Series

You can view a sample question from each battery below. Answers and explanations can be found at the end. For more free sample questions and to try out a free timed quiz on our website, check out our [Free CogAT Kindergarten Sample](#):

Answers & Explanations

Verbal Analogies: B. The correct answer is the glasses. In the top row, the first picture is of an ear. The second picture is a pair of headphones. Headphones are worn on your ears.

The bottom row should follow the same pattern. The first picture shows an eye. The correct answer will be something that you wear over your eyes, making glasses the correct answer.

Figure Matrices: C. The correct answer is the grey pentagon with the gold star in the middle. In the top row, the first box has a white parallelogram. In the second box, there is a similar parallelogram, except it is now grey, and a gold star has appeared in the middle.

The bottom row should follow the same pattern. In the first box, there is a white pentagon. This means the correct answer should have a pentagon that is grey and has a gold star in the middle.

Number Series: B. The correct answer is 5 beads. From left to right, there are 2, 3, and 4 beads. This means that in each row, the number of beads increases by 1. If we continue this pattern, the next row will have 1 more than 4, which is 5 beads.
